Re: Project 01A52, Replace Uptown Windows – Phase 1

Mr. Smith:

As the client for the above mentioned project I'd like to take this opportunity to thank Bunkoff General Contractor Inc., for a very successful project. The project scope involved the replacement of approximately 3,000 windows on three separate three story structures. The spaces adjacent to the window replacements involved, classrooms, laboratory spaces, a museum space, art studio spaces and office spaces.

Bunkoff General Contractors was very mindful of the active campus environment, and still maintained the aggressive project schedule. Your firm was responsive to field conditions which arose and maintained a clear channel of communication throughout the project.

I have received many compliments from faculty, staff and senior administrators regarding the wonderful efforts put forth by Bunkoff General Contractors Inc. Please pass along my many thanks to all team members involved on this project. Your efforts are appreciated and I look forward to working with Bunkoff General Contractor on future projects at the University at Albany.

Respectfully,

Brad Bunzey
Project Manager
